CHAPTER III · THE VERDICT

The final *seal*.

Haunted report check

Final Seal report

THE LEDGER

Coverage

00 0 of 5 checklist items proven (0%).

✓ Proven: 0 ○ Needs review: 4 ◆ Needs outside proof: 0 ↻ Needs a reshoot: 0
⬚ Uncovered: 1

NO.	CHECKLIST ITEM	STATE	EVIDENCE
01	Show the ProofPay welcome screen	○ Needs review (candidates nobody has decided on)	1 candidate
02	Create a new invoice	○ Needs review (candidates nobody has decided on)	1 candidate
03	Fill in the client and the amount	○ Needs review (candidates nobody has decided on)	1 candidate
04	Export the invoice as a PDF	⬚ Uncovered (no usable evidence) Ask for a reshoot	0 candidates
05	State that customer data is encrypted	○ Needs review (candidates nobody has decided on)	1 candidate

THE CABINET

Findings

Cursed Frame (Needs human check) Open

About: Show the ProofPay welcome screen · Line 1: Welcome to ProofPay, the invoicing tool for freelancers.

What was found: 1 frame near the spoken line shares words with it.

What was not found: Not every key word of the line was seen on screen.

Limits of this check: Matching compares words only. Watch the clip to confirm it shows the step.

Phantom Dialogue (Script line not spoken) Open

About: Export the invoice as a PDF · Line 4: Click Export to download the invoice as a PDF.

What was found: The script line exists.

What was not found: No spoken sentence in the transcript covers enough of its words.

Limits of this check: Speech to text can miss words, and the presenter may have said it differently. Listen to the clip.

Needs Outside Proof (Footage cannot prove this) Open

About: State that customer data is encrypted · Line 5: All customer data is encrypted end to end.

What was found: The script makes a claim about security, guarantees or compliance.

What was not found: Footage cannot show this. No visual check was attempted.

Limits of this check: Needs a document, certificate or other proof from outside the video.

Ghost (No visual evidence) Open

About: Export the invoice as a PDF

What was found: A script line points at this item.

What was not found: No frame near a matching spoken line shows it.

Limits of this check: Frames are sampled, so a quick action between samples can be missed. Scrub the video to check.

BACK TO THE SET

Reshoots

Marking a reshoot done only closes the reshoot task. The checklist item becomes Proven only when new evidence is found and a person confirms it.

Open (0)

No open reshoot tasks.

Done (0)

No reshoot tasks are done yet.

BEYOND THE FRAME

Needs outside proof (footage cannot prove this)

Line 5: All customer data is encrypted end to end.

Proof that could back it: Needs proof from outside the video, such as a security report, a compliance certificate or a benchmark.

Proposed by the software only. Nobody has marked it yet.

THE SMALL PRINT

Limits of these checks

- Matches in this report are candidates found by software. Only a person can confirm them.
- Confidence is a ranking, not proof.
- Footage cannot prove claims about security, compliance or guarantees. Those need proof from outside the video.
- Checks look at sampled frames and speech to text, so they can miss a quick action or a misheard word.
